

The Most Trusted Name in Water-Reels®

B-Series Water-Reels®

Horse Arenas

- Softens soil for better, safer footing in show and riding arenas
- Provides excellent dust control

Horse Farms

- Cost effective irrigation for horse farms, equestrian centers and rodeos

Pastures

- Promotes greener, healthier pastures and paddocks
- Quickens recovery after intensive grazing

Gardens & Nurseries

- Perfect for irrigating large vegetable gardens, flowers, organic produce and fruit

Cemeteries & Churches

- Improves appearance of the grounds and increases the value of burial plots

Residential

- Beautifies your lawn and landscape to increase your property value

Small Agricultural

- Increases yields on alfalfa, hay and other small crops by applying water on demand
- Flexibility to apply water at various depths based on individual crop requirements
- Portability allows for cost effective irrigation in multiple locations
- Provides insurance against extended periods of dry weather
- Promotes beautiful, lush forage for livestock
- Irrigates your food plot to attract trophy game and improve your farm's habitat

Ranches & Hobby Farms

Portable • Reliable • Simple

Model	Tube Inner Diameter / Length	Irrigated Width	Irrigated Length	Irrigated Area (Acres)	Drive System	GPM Range	Inlet PSI Range	Booster Pump Options

For more specific performance information, please contact us or your local Kifco dealer

*These models are also available in engine drive

**The E200SST is specifically designed to cool and condition synthetic turf fields in less than 45 minutes

***The T200LSC is a self-contained irrigation and primary pump system for use with open water sources

Practice Fields

- Flexibility to irrigate multiple fields with one machine
- Irrigates sports fields in a single pass

Synthetic Turf

- Only Kifco offers a machine specifically designed to cool, condition and rinse synthetic turf fields

Sports Complexes

- Lowers maintenance costs because there are no in-ground heads to repair or winterize

Stadiums

- Improves playing conditions and appearance of fields

- Improves recovery of damaged turf in high traffic areas

Golf Courses

- Perfect for areas where irrigation is not required year-round
- Improves turf conditions on fairways and roughs
- Excellent way to irrigate hard to reach areas
- Maximizes fertilizer absorption by controlling moisture levels
- Improves the appearance of grass, plants and overall landscape

Parks & Recreation
